

DENMARK 1994 Election Study

Methodology:

International Research Associates of Europe, INRA, carried out the fieldwork for this Eurobarometer from November 14 to December 31, 1994. INRA is a European network of market and public opinion research agencies, coordinated by the European Coordination Office. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO. INRA developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. In all, Eurobarometer 42 interviewed 13,063 citizens of the 12 countries in the European Community (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In addition, 1,082 Austrian, 501 Swedish, 1,000 Finnish, and 1,031 Norwegian citizens aged 15 and over were interviewed with a subset of questions.

Total Sample: 777.

This series of survey was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr Karlheinz Reif and Dr. Anna Melich have directed the surveys. Ronald Inglehart of the University of Michigan helped in making the data available to the social science community. Eurobarometer 42 was carried out in sixteen nations: France, Belgium, Netherlands, Germany, Italy, Luxembourg, Denmark, Ireland, United Kingdom, Greece, Spain, Portugal, Norway, Finland, Sweden and Austria. The interviews were conducted in November and December of 1994. The special topic of the study was the first year of the new European Union.
