

GREECE 1987 Election Study

Methodology:

Each national survey was conducted by a professional polling agency. Representative samples of the total population of age fifteen years and older were drawn in each country. The sampling designs were either multi-stage national probability samples or national stratified quota samples. Faits et Opinions developed equivalent French and English questionnaires for this Euro-Barometer. The questionnaires were translated into other languages by the professional polling agency.

Total Sample: 402.

Data Acknowledgements:

Euro-Barometer 28 was conducted by Jacques-Rene Rabier, special advisor to the Commission of the European Communities, Helene Riffault of Faits et Opinions, and by Ronald Inglehart of the University of Michigan. The study was carried out in all twelve European Community nations: France, Belgium, Netherlands, Germany, Italy, Luxembourg, Denmark, Ireland, United Kingdom, Greece, Spain, and Portugal. The interviews were conducted in October and November of 1987. The special topic of the survey was Relations with Third World Countries and Energy Problems.
